UNIVERSITAS NUSA CENDANA

## VETERINARY MEDICINE STUDY PROGRAM

- Bachelor of Veterinary Medicine (BVM)
- Doctor of Veterinary Medicine (DVM)

*"Serve the welfare of humans through the world of animals"*

### Introduction

## Why Choose Us

**"Committed to the development of professional and independent veterinarians that can compete in local, national and global settings"**

- Both our BVM and DVM programs have been recognised as excellent by the Institute of Indonesia Independent Accreditation for Health Higher Education (IAM-PTKes)
- Unique expertise in dry land archipelago veterinary medicine:
  - Livestock and poultry nutrition
  - Animal infectious diseases
  - Veterinary public health
  - Livestock reproduction
  - Clinical veterinary medicine for pet animals and
  - Wildlife animals
- Our curriculum has been developed based on the Competency Based Curriculum (CBC) that refers to the National Higher Education Standards (SNPT), the Indonesian National Qualifications Framework (KKNI) and Indonesian Veterinarians Competency Standards (SKDHI)

### CURRICULUM & FACILITIES

## What We Provide

- Standardised veterinary course curriculum with interactive classes
- Experts in dry land archipelago veterinary medicine
- Strong national and global research collaborations
- Laboratories and teaching farms that connected with government and private sector facilities
- Cozy and safe classroom and campus environment

### Academic Teams

## Meet Our Staff

- Our teaching staff have standardised educational qualifications (Master's & PhD) that are also known for their nationally recognised expertise, research and publication competence in veterinary science related to unique characteristics of animal health in the dry land archipelago.
- Academic supporting staff that are friendly, responsive and service-oriented
